

SEED ROUND — NOW OPEN

THE AI OPERATING SYSTEM FOR FOUNDER-LED BUSINESSES.

Executive intelligence for small teams — DecisionOS turns every spoken decision, message and document into structured, tracked action.

THE FOUNDER IS THE BOTTLENECK.

01 — THE PROBLEM

- Decisions happen on calls, WhatsApp & hallway chats — then vanish.
- Nothing moves until the founder personally chases it down.
- Teams run on memory, not a shared source of truth.

02 — THE COST

- Dropped follow-ups, missed payments, stalled deals.
- Founders trapped in operations instead of growth.
- Scaling breaks the moment the founder steps away.

SPEAK. IT EXECUTES.

Every input flows into one operational brain that remembers everything, routes work to the right person, and keeps the whole company aligned — without anyone learning a new tool.

WHY NOW.

AI IS FINALLY GOOD ENOUGH

Frontier models reliably turn messy speech into structured, actionable operations.

SMES ARE DIGITIZING

WhatsApp-first businesses want automation without enterprise cost or complexity.

THE RAISE

SEED ROUND

We're raising to accelerate go-to-market, deepen integrations (Zoho, Tally, accounting), and scale the AI pipeline. Capital converts directly into activated SMEs and expanding seats.

USE OF FUNDS

40% GTM · 35% Product/AI · 25% Team

THE VISION

The default operating system for every small business on earth.

Executive Intelligence. **Smarter Decisions.** Stronger Outcomes.
