

SEED ROUND — NOW OPEN

THE AI OPERATING SYSTEM FOR **FOUNDER-LED** BUSINESSES.

DecisionOS turns every spoken decision, message, and document into structured tasks — giving small teams a shared operational brain that never forgets and never drops the ball.

CAPTURE · EXTRACT ·
EXECUTE · ESCALATE

THE FOUNDER IS THE BOTTLENECK.

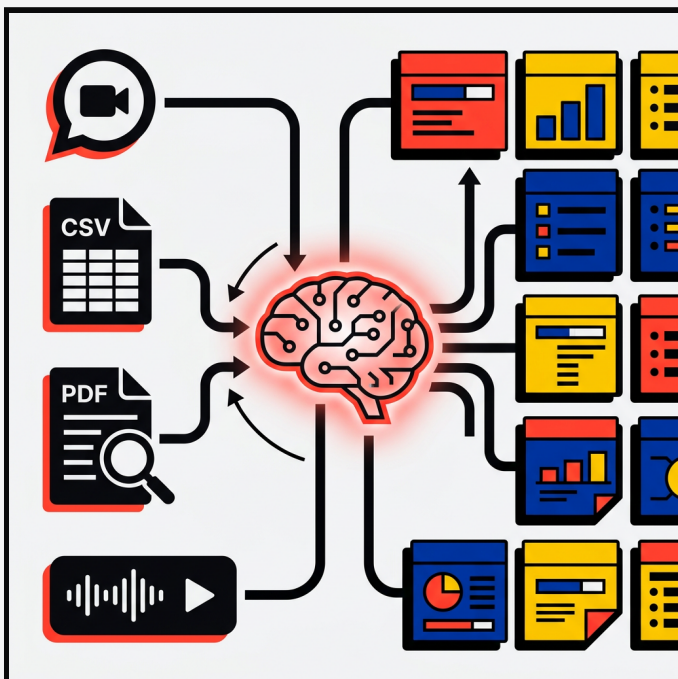

THE PROBLEM

- Decisions are made on calls, in WhatsApp, and hallway chats — then lost.
- Nothing gets tracked until the founder personally chases it.
- Teams work from memory, not a shared source of truth.
- Existing tools (CRM, PM, ERP) are too heavy and nobody adopts them.

THE COST

- Dropped follow-ups & missed payments.
- Founders stuck in operations, not growth.
- No institutional memory — everything lives in one head.
- Scaling stalls the moment the founder steps away.

ONE SYSTEM. SPEAK. IT EXECUTES.

THE DECISIONOS LOOP

- 1. Capture** — voice, text, WhatsApp, CSV & PDF.
- 2. Extract** — AI turns intent into decisions, tasks & workflows.
- 3. Execute** — auto-assigned to the right person with due dates.
- 4. Escalate** — follow-ups & alerts fire automatically.

A COMPLETE **OPERATIONAL BRAIN**, NOT ANOTHER APP.

UNIFIED INBOX

WHY NOW.

AI IS FINALLY GOOD ENOUGH

Frontier models can now reliably turn messy speech into structured, actionable operations.

SMES ARE DIGITIZING

WhatsApp-first businesses want automation without enterprise complexity or cost.

THE RAISE

SEED ROUND

We're raising to accelerate go-to-market, deepen integrations (Zoho, Tally, accounting), and scale the AI pipeline. Capital converts directly into activated SMEs and expanding seats.

USE OF FUNDS

40% GTM · 35% Product/AI · 25% Team

THE VISION

The default operating system for every small business on earth.

Let's build the operational brain for founders.
