

Integration Setup Guide

How to get each API key and where it plugs in. Send the agent your values and it will wire & test them.

What is already live (no keys needed)

Your AI operating brain runs entirely on the built-in **Emergent LLM key** — no setup required from you:

- › **Unified Inbox** — voice/text capture, PDF invoice OCR, CSV/Excel import (Gemini + Claude).
- › **Decision Timeline & CEO Journal** — git-style history per decision + a day-by-day diary.
- › **AI Prioritization** — tasks scored on Impact / Revenue / Risk / Urgency and ranked automatically.
- › **Relationship Intelligence** — AI relationship & risk scores on every 360° customer/supplier profile.
- › **Business Calendar** — payments due, deadlines, deliveries, complaints and birthdays in one agenda.
- › **Meeting Notes** — record or paste a meeting; AI writes the minutes and creates assigned action items (Whisper + Claude).
- › **Operating Score** — company & per-employee health scores (Execution / Finance / Sales / Responsiveness).

Tip: Keep balance on your Emergent Universal Key (Profile → Universal Key → Add Balance, or enable auto top-up) so AI features keep running in production.

Optional integrations — status

Integration	Unlocks	Status
Meta WhatsApp	Forward invoices/POs to WhatsApp → auto-filed	Needs keys
Twilio	Real SMS employee invites	Needs keys
Zoho Books	Sync customers, invoices, payments, bills	Needs keys
Resend	Real daily CEO digest emails	Needs keys
Tally	Read-only accounting sync (local bridge)	P2 / later

Base URL used below (preview):

<https://founder-os-58.preview.emergentagent.com>

Your production URL changes after deployment (...emergent.host) — the agent updates webhooks/redirect URIs then.

1 · WhatsApp Document Ingestion — Meta

Enables: employees forward an invoice / PO / payment screenshot to your WhatsApp number and DecisionOS reads & files it automatically.

Values to collect: `WA_ACCESS_TOKEN`, `WA_PHONE_NUMBER_ID`, `WA_VERIFY_TOKEN`, `WA_APP_SECRET`

Steps

1. Go to **developers.facebook.com** and log in.
2. Top-right → **My Apps** → **Create App**.
3. Use case: **Other** → Next. App type: **Business** → Next.
4. Enter an App name (e.g. "DecisionOS") + email → **Create App**.
5. On the dashboard find **WhatsApp** → **Set up**.

6. Sidebar → **WhatsApp** → **API Setup**: copy the **Temporary access token** (WA_ACCESS_TOKEN) and **Phone number ID** (WA_PHONE_NUMBER_ID).
7. Invent your own verify token, e.g. decisionos_verify_9f3k → WA_VERIFY_TOKEN.
8. Sidebar → **App settings** → **Basic** → Show **App secret** → WA_APP_SECRET.
9. (Production) Permanent token: Business Settings → System users → Generate token with whatsapp_business_messaging + whatsapp_business_management.

Connect the webhook (after the agent adds your keys)

1. Sidebar → **WhatsApp** → **Configuration** → **Webhook** → Edit.
2. Callback URL:
<https://founder-os-58.preview.emergentagent.com/api/webhooks/whatsapp>
3. Verify token: the same WA_VERIFY_TOKEN → **Verify and save**.
4. Webhook fields → **Manage** → Subscribe to **messages**.
5. Test: send an invoice image to the test number from your phone.

Send to agent: WA_ACCESS_TOKEN, WA_PHONE_NUMBER_ID, WA_VERIFY_TOKEN, WA_APP_SECRET, and which workspace should receive documents.

2 · SMS Employee Invites — Twilio

Enables: real SMS invitations to mobile numbers you add during onboarding / in Team.

Values to collect: TWILIO_ACCOUNT_SID, TWILIO_AUTH_TOKEN, TWILIO_FROM_NUMBER

Steps

1. Sign up at [twilio.com/try-twilio](https://www.twilio.com/try-twilio) (free trial credit).
2. Verify your email and phone number.
3. Open the **Twilio Console** (console.twilio.com).
4. Account Info: copy **Account SID** (TWILIO_ACCOUNT_SID) and reveal + copy **Auth Token** (TWILIO_AUTH_TOKEN).
5. Phone Numbers → Manage → **Buy a number** with SMS capability. Copy in E.164 form e.g. +14155551234 → TWILIO_FROM_NUMBER.
6. (Trial) You can only text numbers verified under **Verified Caller IDs** until you upgrade.
7. (Optional, better at scale) Create a **Messaging Service** and use its SID instead of a from-number.

Send to agent: TWILIO_ACCOUNT_SID, TWILIO_AUTH_TOKEN, TWILIO_FROM_NUMBER.

3 · Zoho Books Connector — Zoho

Enables: pull customers, invoices, payments and bills from Zoho Books into DecisionOS.

Values to collect: Zoho_CLIENT_ID, Zoho_CLIENT_SECRET, Organization ID

Steps

1. Log in at api-console.zoho.com.
2. **Add Client** → choose **Server-based Applications**.
3. Client Name: DecisionOS.
4. Homepage URL: <https://founder-os-58.preview.emergentagent.com>
5. Authorized Redirect URI:
<https://founder-os-58.preview.emergentagent.com/api/zoho/callback>
6. **Create** → copy **Client ID** (Zoho_CLIENT_ID) and **Client Secret** (Zoho_CLIENT_SECRET).

7. Find your **Organization ID**: Zoho Books → Settings → Organization → Profile.
8. Note your data center domain (.com / .in / .eu) and tell the agent.

Send to agent: ZOHO_CLIENT_ID, ZOHO_CLIENT_SECRET, Organization ID, and Zoho domain. The agent guides the one-time OAuth consent to mint the refresh token.

4 · Email Daily Digest — Resend

Enables: real daily CEO digest emails (currently logged/mock).

Values to collect: RESEND_API_KEY, RESEND_FROM_EMAIL (verified sender)

Steps

1. Sign up at **resend.com**.
2. **API Keys** → **Create API Key** → Full access → copy → RESEND_API_KEY (shown once).
3. **Domains** → **Add Domain** → add the shown DNS records at your registrar → **Verify**.
4. (No domain? Test-send from onboarding@resend.dev; production needs a verified domain.)
5. Pick your from address e.g. digest@yourcompany.com → RESEND_FROM_EMAIL.

Send to agent: RESEND_API_KEY and your verified from-email.

5 · Tally Connector (P2 — no API key)

Tally has no cloud API. Integration needs a small local agent/bridge on the same machine/network as Tally (ODBC/XML on port 9000). No signup — tell the agent when you're ready and we'll plan the bridge.

Where these values live

All keys go into /app/backend/.env — the agent adds them; never commit real secrets. Missing keys simply keep that integration dormant; the rest of the app runs normally.

Quick checklist

- › **Meta:** WA_ACCESS_TOKEN, WA_PHONE_NUMBER_ID, WA_VERIFY_TOKEN, WA_APP_SECRET
- › **Twilio:** TWILIO_ACCOUNT_SID, TWILIO_AUTH_TOKEN, TWILIO_FROM_NUMBER
- › **Zoho:** ZOHO_CLIENT_ID, ZOHO_CLIENT_SECRET, Organization ID, domain
- › **Resend:** RESEND_API_KEY, verified from-email

DecisionOS — the operating brain for founder-led SMEs.
